Professional Experience

Canada Revenue Agency -- Jr. Analyst — Toronto, ON - (May 2023 - Present)

Company Summary: As a key federal institution, CRA utilizes a robust IT infrastructure to store and manage a vast amount of taxpayer data, including personal and financial information.

- Engineered and maintained advanced Power BI dashboards, streamlining HR and IT reporting processes across multiple departments.
- Played a pivotal role in the collaborative data analysis effort, which influenced strategic decisions by providing in-depth insights into project statuses and network bandwidth usage.
- Facilitated stakeholder engagement sessions to accurately capture and address data reporting needs, improving cross-departmental communication and efficiency.

Canada Revenue Agency - Jr. Project Officer — Toronto, ON - (Sep 2022 - May 2023)

- Executed meticulous quality assurance for business architecture documentation, ensuring project accuracy and integrity.
- Directed SME efforts in transitioning to GCdocs, significantly improving document management and accessibility across government agencies.
- Successfully delivered 4 projects on time and within budget.

Turkish Motor Insurers' Bureau (TMTB) - Sr. Systems Analyst — Istanbul, TR (Apr 2021 - Dec 2021)

Company Summary: TMTB oversees motor insurance regulation in Turkey, coordinating with insurers to manage policyholder rights and data.

- Automated the finance department's formal letter distribution process, managing over 12,000 documents annually. This initiative reduced manual handling by 45% and operational costs by 12%, equating to an annual savings of approximately $30,000.
- Led a project to implement Microsoft Planner for workflow management, enhancing project tracking and team productivity within the systems analysis department.

Projects

- Exploratory Data Analysis and Model Training | Python, numpy, scikit-learn, mathplotlib, model training
- Permanent Residency admission dashboard | Power BI, Fabric, ETL
- Visualizing global water scarcity | Tableau, data prep, ETL

Education

Algonquin College, Ottawa, ON

Business Intelligence System Infrastructure Graduate Certificate (Jan 2022 – Sep 2022)
- Dean's Honor; GPA: 3.86
- Team project: Analyze future staffing needs using Power BI, findings that influenced AAFC's hiring strategies.

Hacettepe University, Ankara, TR

Bachelor of Science in Actuarial Sciences (Sep 2008 - Jun 2013)
- Conducted an exploratory statistical analysis project using SPSS Modeler, which identified key trends affecting insurance premium calculations.
